

Transform Your Practice with SDO® Training

Sensory Dynamic Orthosis Theory, Clinical Application and Measurement

Master the art and science of custom lycra SDO® garments in this comprehensive training program. Learn how to dramatically improve your patient outcomes through enhanced musculoskeletal stability and optimized postural alignment.

Why Join?

Transform your practice with cutting-edge skills in dynamic orthosis therapy. This intensive program combines theoretical knowledge with extensive hands-on practice, empowering you to offer innovative clinical solutions for your clients with neurological conditions.

Course Highlights

Through expert-led instruction and practical workshops, you'll master:

- Advanced principles of SDO® technology and their clinical applications
- Strategic optimization of reinforcement panels for maximum therapeutic benefit
- Precision measurement techniques ensuring perfect fit and function
- Professional fitting protocols that provide optimal outcomes
- Learn in our small classes (maximum 12 participants) to provide ample opportunity for practical skill development.

Who Should Attend?

Ideal for physiotherapists, occupational therapists, and orthotists seeking to integrate innovative SDO® solutions into their paediatric or neurorehabilitation practice.

Course Locations:

- Newcastle, 17th March
- Sydney, Novotel Sydney Airport, 19th March
- Brisbane, 2nd April

Time: 9.00am-4.30pm

Cost: \$200 (Includes materials, morning tea, lunch and afternoon tea)

Registration: complete the attached registration form and return to thrive@wellandable.com.au
